## BPIR Declaration

Version: V1

---

### Designated building product: Class 1

---

### Declaration

Cemimax New Zealand Limited has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

---

### Product/system

<b>Name</b>	Cemimax DP70
<b>Line</b>	Low emission, multi-purpose dispersion primer for both interior and exterior use.
<b>Identifier</b>	

---

### Description

Dispersion Primer with a wide range of applications, for interior and exterior use, providing overlayment compound with all our levelling products is applied within drying time of primer. Not to be left exposed to the elements for more than 2 hours.

---

### Scope of use

Use on surfaces with well-bonded, waterproof adhesive and smoothing compound residues.

- Ready to use
- Excellent bond
- Rapid drying
- High coverage
- Solvent-free
- Suitable for both interior and exterior use

---

## Conditions of use

- The surface should be sound and clean, also dried without any loose particles or contamination. Any debris should be completely removed by vacuum or thorough cleaning leaving the substrate ready for use.
- The product can be diluted with water if required. The water proportion is based on the substrate situation (Note: If the existing substrate is ceramic tile, it should not be diluted).
- Apply the primer evenly to fully cover the surface using a fine-pored foam roller.
- Drying times: allow to dry to a clear, transparent, almost tack-free film. Depending upon floor temperature and humidity, in favorable climatic conditions and on absorbent surfaces, a drying time of 1-3 hours is normally adequate.

---

## Contributions to compliance

B2.3.1(b) (ii) Cemimax DP70 has durability of at least 15 years. F2.3.1 Cemimax DP70 is safe when handled correctly as per Application Instructions on TDS.
